

# zanett >> Outsourced DBA

*Industry studies show 30% of US firms outsource DBA services. Why is that? The cost for one DBA to be trained and certified on Oracle 10g requires \$21,000 in tuition alone.*

*Once completed, ComputerWorld reports that a DBA requires \$5,000 per year in training to stay current in technology.*

*Once trained a DBA's marketability increases and TechRepublic says that a DBA will change jobs every 4 years.*

*Outsourcing your DBA needs eliminates these costs and risks from your business. That's why our customers continue to enjoy the value and security of using our services.*

The DBA Group has been helping companies with their database needs since 1996. We have brought together a team comprised of the most talented database professionals in the industry.

Our company is a professional services firm that specializes in the delivery of database services and solutions. We service the needs of both Oracle and Microsoft SQL customers. We customize our services to meet your needs and our experience shows. Our DBA's have on average 10 years paid professional database experience in real world environments. Oracle Corporation states, **"79% of all Oracle outages are attributed to human error"**.

We firmly believe that the best way to mitigate this risk is to utilize Senior Professional Database Administrators. Let the DBA Group provide you peace of mind in knowing your databases are in the hands of those with real world experience.

*"I have had an ongoing relationship with the DBA Group since 1996. I have called on the DBA Group to assist me with a number of Technology Projects in that time. In my 28 years in Government Service and 10 years in the Civilian Sector, I have not worked with a more professional and dedicated company."*

*Pat Barrett  
VP IT, Knology Holdings Inc.*
